## Challenge

Let it hereby be known that on this day, the Nineteenth Day of September, in the Year of Our Lord Nineteen Hundred and Seventy-two, the Engineering Society 'A' of the University of Waterloo has challenged to all Universities in Ontario in the form of a competition to answer the everlasting question: "Who are the foremost drinkers in Ontario?"

shall be rigidly adhered to. In the last competition of this sort, only six universities had the courage to show and the Waterloo "Golden Guzzlers" took an overwhelming First at an all time record of 12.2 seconds.

The above mentioned Society requests that if you have the raw courage to show and the Waterloo Engineering Society will be glad to have you respond to the challenge in the way of some competition to answer the everlasting question: "Who are the foremost drinkers in Ontario?"

**IV Container:** The official boat racing container shall be the standard LCBO 8 oz draft glass. **V Procedure:** The team shall position itself in front of a table on which there are two containers of beer directly opposite each team member - ten containers in all.

The referee shall ask the team if it is ready, and when so, pronounce 1... 2... 3. When three is uttered, the Lead Man shall drink the contents of his first container, touch the empty container to the table, then invert the container over his head. As soon as the Lead Man's container touches the table, the Second Drinker may pick up his container, drink its contents, touch the table, and invert it over his head. The Third Drinker commences when the Second Drinker's container touches the table. And so it goes, until the Fourth Drinker's container touches the table.

The Anchor Man then drinks the contents of his first container, touches it to the table, raises his second container and drinks its contents, then touches the second container to the table. Then invert both over his head. When the Anchor Man's second container touches the table, the Fourth Drinker drinks the contents of his second container, and so it goes until the Lead Man touches his second container to the table. The elapsed time for the race shall start with the utterance of the word "three" by the referee, and end when the Lead Man's second container touches the table.

**VI Disqualifications:** A team shall be disqualified for any of the following:

- a) non-continuous drinking - if any team member cannot maintain flow of liquid from container to mouth, the team shall be disqualified.
- b) if any team member touches either of his glasses (or other glasses) prior to the stipulated time, (see procedure) the team shall be disqualified.
- c) Should any team member drink less than 90 per cent of the contents of either of his containers, the team shall be disqualified.

**VII Referees:** There shall be a maximum of three referees, and a minimum of two. One referee shall start the race, (in the manner indicated in Procedure) and watch for any infractions leading to disqualification. It is also his responsibility to ensure that all containers are "topped" up prior to the start of the race. The others are to time the race. Upon completion of the race, the referees meet to discuss any infractions, and if none occur which will disqualify the team, then announce the official time of the race. The decision of the referees is final, and may not be appealed.

**Note:** Gross and/or indecent conduct on the part of the team shall not be tolerated. This is a gentleman's sport!

We have the challenge, have you the threat? Generous enough to try? Contact the Eng Soc Social Committee, C/O the Engineering Stores, Drink up! Be held later this month. See this space (fwd) - Yed.

If you need exposure (or 2) or want to flash your

**'BOZO'** for the audiophile

**WE NEED A TITLE FOR THIS.**

The legend lives on from King's College on down, Of the briquette they called Sanford Fleming. The place, it is said, became one of the dead, When Room 126 was a'flaming. With computers in store, several thousand times more Student names and their marks could be kept there. The maintenance crew was a bone to be chewed, For not once had a janitor swept there. The place was a sty, and the home of Eng Sci, Which somehow avoided the fire checks. As the old buildings go, it was older than most, It was older than even the Annex. In spite of cold spells, it was hotter than hell, Though the temperature soon would get higher. And later that night, when the fire bells rang, Could it be that the place was on fire?

## Eng. Soc Deep In The Hole

October 6, 1972

"Tight" is the word to describe this year's Society Budget. As in previous years, each undergraduate student contributes seven dollars towards the Engineering Society (This is one of the lowest fees levied on a student by any student organization on campus). SAC is also giving the Society a two dollar per undergraduate student educational rebate.

Under the new constitution of the Society various committees have sprung up. This means more activities and consequently more money is to be spent.

The Administrative expenses include salaries for Jan, Audit fees, telephone, Bank charges

and Photos for the executive. The Communications Committee's \$3500 includes grants to the Toike Oike as well as all the printing cost for Tiny Toike and other publications of the Society.

The society is giving \$1.00 per student in the 2nd, 3rd, and 4th year of each course to their respective Course Club, whereas the First Council will receive \$300.00 for the activities for 1st year students.

The Educational Committee will be spending the money on running course evaluations and experimental course of forum.

Professional Development Committee requires about \$500 to keep Synergetics 73 going and \$150 for other minor events.

Things to do TODAY!

EDITORIAL

EDITORIAL

Dear Toikesters,

Alas, with the year coming to a close, you can't help but feel a little sentimental and reflective.

Much to everyone's benefit, I went ahead and dug through the Olde Toikes we have lying around and brought only the finest eclectic pieces!

Brace your cassette players and prep your brain for that baby boomer insensitive humor, Ye Olde Toike Oike is here!

I guess I should have seen that coming.

Despite this, I found a gem of a "Toikeditorial" from 1971 (See below).

Why are we "celebrating" or discussing this? Its because we rarely get an opportunity in life to really peer into the day to day life of Skulgians past. Humor, or rather, the Toike is one way we can see. We can see how much Skule has changed, how we define ourselves differently. Also, we can see what hasn't changed!

In this issue you will read side-by-side 2018 fresh articles along with various articles and headlines **FROM THE PAST CENTURY** peppered throughout. That's right, the Toike is over 100 years old. You know what they had back then? Typhoid outbreaks! What a time to be alive.

I initially wanted include significantly more articles from the Toike's revival in the 60s and 70s. However, I found that many of them were either tooooooo contextual to the time (like Skule gossip) or waaaaaaay too "edgy" for our dear VP comm's knickers (by edgy I mean sexist or vulgar).

In this "Toikeditorial" the editor talks about something that will always ring true for The Toike Oike, no matter the age. The Toike is here for the readers, not anyone else. If you like our content, we'll keep writing it! If you don't like it, come write for us! Show us how you want it.

Thank you so much for an unforgettable Toike year! A big thank you to the Toike Staff. I'll see you at the next meeting ;)

*With love,  
Jennifer Dixon  
Editor-in-Chief 177-178*

TOIKEDITORIAL

A perennial question asked of all Toike staffers is "Where did the name 'Toike Oike' come from? / The latest to put this in writing is R. S. MacLennan 5T1 of R.S. MacLennan and Associates, Consulting Engineers. Without further ado we provide the following letter from our voluminous files:

DEPARTMENT OF MINES  
CANADA  
GEOLOGICAL SURVEY

My dear Mr. Wright, Dec. 5/35

I was very glad to get your letter. It carried me back to the good old days and revived many pleasant memories of the old "School" days. I remember quite well the birth of the school "Yell" — "Toike Oike" — It came about in this way: — a group of us. Stovel, Burnside, Carter, Piper, etc. thought that the school should have a catchy yell, that could be used on all occasions, such as football matches, etc. and as a triumphant yell of victory when we succeeded in stealing the bicycle racks from the Arts building and for other such stirring occasions. Each one of the group was to cease studying at night and concentrate on the composition of the yell. At a specified time, the fruits of each ones labors were duly heard and tried out. The choice was the present yell, which Pipe has made up. Where he got the words "Toike Oike" from, I do not know, but we were under the impression that he coined them for the purpose. If Piper is in the land of the living, he alone could tell. I have not heard of him for several years. More than the above I do not know. The "Yell" has lasted so many years, that it is safe to say it was a good one. With kind regards, Yours sincerely, WALTER H. BOYD 9T8

The name Toike Oike was applied to the first few years of the century to a publication which has been around under various names since about 1889. How does that grab you, ancient obscenity buffs?

It has come to our attention that another campus publication (which we will avoid naming to save them from embarrassment) has of late been construing that the Toike is sexist and yet immune from censorship, while that paper's own efforts to encourage self-improvement through self-stimulation, are subject to suppression. If one truly believes that we have never been censored one may consult our joke editor on the subject of his orogenital fetish! The Toike has not been shedding crocodile tears over this; we are not in the business of extending the moral frontiers of our society.

It is indeed ironic that the forces attempting to create parity for females spend their time attacking the Toike and yet are silent on such obvious examples of discrimination and bad taste as the Women's pages of Toronto newspapers.

The Toike does not try to project an image of engineers but rather utilizes a style which has proven very successful over the years. Events such as the slave auction must be understood as 'theater' with both audience and girls filling roles they know to be fantasy.

The supervirile engineer, the mocrominded artsie, the fawning enches, etc., are all part of a formula which has provided entertainment for the thousands of readers over the years. As soon as the formulas fail to produce results, new values will be assigned to the variables. Entertainment, through the advertising it attracts, pays for the paper; if you know a better way of being entertained come and write for us.

COLOPHON

Every full moon, or first Friday of the month, the members of the Toike Oike gather in the darklands of the Greater Toronto Area to perform an ancient ritual. Passed on through the centuries, this ritual summons *Ridicula*, the great goddess of satire. At climax, members of the Toike Oike are blessed with natural writing abilities and are filled with humor. By sunrise, ink spills onto the pages of your leftover print quota and the students of UoT Engineering are gifted once again with a new issue of the Toike Oike.

WHAT HO?

"Toike Oike" is a pseudo-Early Modern English stock prefix suggesting an "old, as in Medieval old" feel. A typical example would be *Toike Oike English Pubbe* or similar names of theme pubs. The anachronistic use of "Toike Oike" dates at least to the late 18th century. The use of the term "Toike" to mean "the" derives from Early Modern English.

DISCLAIMER

The fair-minded opinions expressed in this newspaper reflect those of the Engineering Society and the University of Toronto. In fact, they even reflect the opinions of the writers and the engineering community in general. NOT! If you happen to find any of the material within these pages offensive, do not try to sue us, as we have a crack team of racially diverse lawyers ready to bring tha pain and give out mix tapes. Sucka MC's ain't shit.

Regular Toike Writer Can't Think of Anything Clever To Write, Fills 300 Words with Sex Puns

Carla Keen  
Toike Oike Wannabe

As the deadline for content entries reaches only a few hours, one desperate Toike writer decides to resort to the basest form of humour in order to produce a satisfying article.

“Yes, I know that we just had SexToike,” mutters this anonymous writer to themselves while furiously pounding their keyboard, “But if I can squeeze a few dick jokes in, that’s an easy ride.”

Yes, most of the people who pick up the Toike will be doing so for high-quality, unbiased journalism and not a bunch of dirty jokes, but nonetheless we all need to settle at one time or another. This may not be the biggest, longest, most powerful or high-impact article in the Toike, but hey, it’s technique that counts, right?

How do you really give the Toike Oike what it needs- a steamy, passionate act of reportership? Not that it has ever been particularly picky, after spending decades being

crammed full of all manner of articles. And with its circulation across campus, being picked up everywhere from libraries to the Pit at any time of day? This is a student paper that knows how to get around.

Hoping to garner some more readership, the article quickly became doubly penetrated with both low-quality jokes and less than satisfactory grammar that fails to sufficiently lubricate the sentence flow. The writer thrustred in unnecessary adjectives and fingered in uncreative verbs.

After a long, hard, sweaty session of writing, the author is ultimately unsatisfied, but fakes it anyways.

“Oh, Yeah, Baby! That’s the article I wanted right there!” The haggard Toikester states in a monotone voice. This feigned enthusiasm has become all too common in their relationship with the Toike- maybe it’s time to spice things up a bit with some toys, like a nifty new keyboard.

“a pleasure to walk the halls ...”

BAHEN

continued from page 5

Overall, the building was very well designed, with careful attention to detail. The main hall is an absolute masterpiece. Throughout the building there is plenty of direct or ambient natural light, washrooms and drinking fountains are well placed, and there are benches and nooks with blackboards lining some walkways.

There are only a few things that stop me from giving this building a full five stars. First, the building was unfinished at the time of review. Second, there were no plants yet, which made the building seem rather bland and artificial. Third, parts of the building seem too impersonal, with endless rows of office space in some sections. Lastly, there was no apparent place for a cafeteria or food services outlet. It seems like a building of that size should have its own food court. Vending machines don't count!

Despite these complaints, it was still a pleasure to walk the halls (although the majority of the building features open space rather than hallways), finding the many cool vantage points inside the building. Considering that

A view looking up at the spiral staircase from the far west end of the main hall. Notice how the skylights are reflected and bounced around by the glass panels. This is one of the coolest and post vertical views on campus.

I've spent my first two years in enclosed places like Galbraith and Sanford Fleming, the Bahen Centre was a welcome change and provided a sorely needed breath of fresh air.

☆☆☆☆

The Toike Oike, Vol XCVI, Issue I, 2002

Old man Outraged at Trendy Cafe for adding “Activated” Charcoal in drink

Tommy Grass  
Toike In-Field Reporter

Harold Ng spoke out in outrage this week at trendy hipster establishment Cafe Bougéay, which recently celebrated both its grand opening and closing down ceremony. Mr. Ng's grandson, Chicago Ng, was the one who recommended the cafe to his grandfather, as its hours of operation were from 11:00AM to 11:35AM, Tuesday - Thursday, coinciding perfectly with his morning walk.

Mr. Ng was outraged, however, when some “lousy whippersnapper”, as he put it, tried to poison the man’s morning coffee with a substance they labelled ‘Activated Charcoal’. Ng Had this to say, “It’s an outrage I tell’s ya. Back in my day Charcoal was used to power the mighty steam engine, none of this frilly fufu nonsense they’re putting in our drinks I tell’s ya. What kinda idiots do they take us for. Trying to feed us Charcoal. It’s a disgrace, a downright disgrace.”

We reached out to the store’s ex-owner, Mark Bougéay, for comments. “Yeah man, it’s just like a way of life you know, like it changes you. Once you make the switch to all natural organic paleo you just see the world in a whole new light, and our ingredients are always 100% organic guaranteed, we hand make them in store, I personally hand activate the charcoal myself.” We have no idea what the young Mr. Bougéay was talking about truthfully but we’re sure he means well.

POINT/COUNTERPOINT

The Earth Is Flat vs No its just Saskatchewan

By: Steve By: Rick from the Barn

If the earth was some rock spinning through space, then wouldn't we all just get thrown off and die? The earth is clearly a large disc that all the other cosmic bodies orbit. The snowy arctic mountains are in the centre and the seas surround it, and a massive wall of ice borders the edge. You don't hear about the edge of the world because it is a dangerous place and people do not make it back alive.

The bottom of my shoes are flat. The bottom of buildings are flat. A map is flat. Your concept of gravity still exists but cannot pull the earth into a sphere because the plane at which the earth accelerates is so large it can be assumed to be endless.

Don't believe globes, that market is just another money grabbing scheme from the government.

Sponsored article by The Phat Earth Society

'Round these parts the land is flat enough that it defines who we are. Last week my girlfriend left me and walked out with half my stuff. It's been five days and I can still see her leaving if I look out the window. The beer hasn't been carbonated since 1982 and all the music is sung by this old creep who's always in A minor. And don't get me started on my wife.

About the only things that aren't flat around here are the roads. You'd think for a town as flat as our that the roads would be easy to drive on. But aside from winter, the other season is road construction. Sometimes you'll hit a pothole and the truck will jump up and you might get to see Alberta.

Stranger Than Lies

SCIENCE FACT

(well, almost fact; I mean, the real stuff's pretty dull if you know what I mean)

by I. (sic) Amisov

Did you know that:

—The earth is made entirely of reconstituted parrot meat. Of course, there has been a great deal of reconstitution.

\*\*\*

—A two-day-old gazelle can outrun a full-grown horse. The offspring is known as a gazorse.

\*\*\*

—Even under the microscope, when examining the common flea, it is impossible for the human eye to tell a male from a female. Luckily for the fleas, they can tell.

\*\*\*

—Glass, though hard to the touch, is actually a liquid. This is in no way related to the expression "Chug-a-jug", and Health and Welfare Canada advises danger to health increases with amount drunk—avoid swallowing.

\*\*\*

—In her lifetime, one termite queen will produce over 500 million children—and not one will send her so much as a card a Christmastime!

\*\*\*

—The heaviest organ in the human body is the liver, weighing 1.59 kilograms; or, in the old British system, three pounds ten shillings and ninepence.

TOIKE TO PUBLISH WEEKLY

Courting for Engineers

Believe it or not folks, spring is finally upon us! As the cool winter air, will soon make way for the warm smell of concrete, its time for lovers to emerge from their study holes and let their love blossom. Like the growing sweat stain that will be snaking its way across the front of your shirt.

Yet for those who continue to languish within their dens, akin to the Beast looking miserably for his Belle, this can indeed be a daunting and stressful time. Fear not! We at Ye Olde Toike Oike have compiled a list of 4 tips that can help you in your noble quest to seek your beloved, while staying away from that horrid yellow orb in the sky.

Spockthe Difference and Execute O'Sixtynein

Toike Oike Experienced Matchmakers

1. Lecture Capture and Chill

This is the sort of argument every respectable couple has had - what sort of TV show or movie should they watch in the comfort of their homes and couches, away from the prying eyes of the 'singles'. These situations can often get ugly, and for someone beginning to foray into this curious world of courtship, that could have disastrous consequences. Therefore, a brilliant strategy to reach common ground with your date is to watch lecture captures.

Yes, lecture captures. If the whole point of watching a feature length presentation is to eventually fall asleep in each other's arms, what better way to do that than to put up a lecture on a good sound system and watch it at normal speed.

2. Take Them on a Picnic

The oldest and most effective trick in the book - a romantic picnic is the easiest way into a people/wopeople's heart. Yet it is imperative that said picnic occur in a location that is appropriate to the mood. You might be wondering - gee, how is such a proposition possible, given my current financial status as a glorified high school student? Allow us to elaborate: Within SF is a place that, with its electrifying atmosphere and romantic fluorescent lighting, is sure to help you hack your way into your date's heart. We are, of course, talking about the ECF labs. Impress your date with mind blowing syntax and comprehensive comments and we guarantee you, anyone would want your user input by the end of this date. However, we must caution you against bugs and segmentation faults -- always check storage space before entering values

3. Get Creative

Confused about roleplay? Afraid to try something risque in the bedroom with your new beloved? We at the Toike would like to humbly present some ideas that are guaranteed to you go KABOOM all over them. The Blue & Gold Committee room can provide you with an excellent spot to get yourself all tied up (not to mention the dim lighting and basement dungeon aesthetic - dungeons are all the rage in the United Kingdom) . Or, you could appeal to your partner's inner anima by displaying strength in a way characteristic of a male wooing his mate. How, you ask? Turn on your partner by patiently connecting to 'UofT' and 'eduroam'. Finally, If you are worried about costs or indeed being caught in a compromising situation as visiting an adult store, you could visit the ECE labs to find all the electrical wires and clips to suit your needs

4. Switch into Arts

Woo your beloved with classically romantic concepts such as free time, manageable amounts of debt, a GPA that you don't have to mumble in conversation out of embarrassment, and perfect spelling. A few other benefits of such a switch are: (1) Unemployment will guarantee lots of time to spend together on romantic dates; (2) Impress your date by quoting theorists like Johnlock(e); (3) Amaze your paramour with your impressive beanie collection and the deep, reflective meaning of your infinity and japanese text tattoos; (4) Hold each other and cry when you realise that life is but a meaningless ride down a river that leads you nowhere and only ends with the eventual heat death of the Universe.

Engineering Students Draft Plan for CEIE Building “Upgrades”

Kant Cum

Toike Token Civ

Before the new CEIE building opens its doors, a group of students are vowing to do some reconstruction to make the new student area feel more like home.

Sources say that students are plotting to give the building a new red paint job and reduce its size to a more manageable and comfy area. The movement comes 52 years in the making from when the old Little Red Skulehouse was demolished. The old Skulehouse was a quaint three-story building and played a large role in the shaping of the U of T Engineering community.

Along with reducing the size of the building and painting it red, students also plan to remodel the interior of the building in an effort to make it fit with the more traditional times. Early blueprints show that the new Little Red CEIE Skulehouse will have plenty of space for wall murals reflecting Skule spirit and all of twowomen's washrooms.

Norm and Gord McLuhan

Discuss Revolutions

This monthly column features a titillating discussion between brothers Norman and Gordon McLuhan from Moose Jaw. This month's column is sponsored by the NDP. The NDP - like socialism but, like, not?

Norm: Hi, I'm Norm McLuhan, and this is my brother, Gord -

Gord: Hi there.

Norm: - and today we're gonna discuss, uh, revolutions.

Gord: Kind of a heavy subject, eh?

Norm: Oh yeah, real heavy.

Gord: So a revolution is what hosers make at the start of each new year -

Norm: - no, ya hoser, that's a resolution. A resolution is -

Gord: - no, a resolution is the number of pixels on your television.

Norm: No, that's just "resolution."

Gord: That's what I said, a resolution is the number of pixels on your television.

Norm: Goddammit, Gord.

Gord: Sor-ry, eh.

Norm: Just stop, will ya? You should take this more seriously. This conversation is being published in a prestigious paper.

Gord: What paper?

Norm: The Varsity or something.

Gord: Shit.

Norm: Yeah.

Gord: Well I'm sorry, Norm. I'll try to be more serious from here on out.

Norm: Thank you, bud.

Gord: I guess you can say that we came to a resolution, eh Norm? Norm?

Norm: Yes, Gord. So a revolution is when a -

Gord: - an object turns a full three-hundred-sixty degrees 'round an axis back to its starting position.

Norm: I... I suppose it is.

Gord: Damn right it is.

Norm: Three-hundred-sixty degrees seems pretty hot, huh.

Gord: Oh, Norm. Just stop, will ya? You should take this more seriously, eh. This conversation is being published in a prestigious paper.

Norm: This has been Norm and Gord McLuhan -

Gord: Ho there.

Norm: - discussing revolutions. Kinda

A woman calls her butler into her bedroom, "Charles," she says.  
"Yes, madam?" Answers the butler.  
"Charles, take off my dress."  
"Yes, madam." he says as he remover the dress.  
"Charles, take off my bra."  
"Yes, madam." Ha says as he removes her bra.  
"Now, Charles, take off my shoes and stockings."  
"Yes, madam." He says as he removes her shoes and stockings.  
"Now," says the woman, "Take off my panties. And I'm warning you, Charles: you're going to lose you job if I ever catch you wearing my cloths again!"

January 8, 1995

Dear Woman's Centre  
We haven't recieved that time of the month yet and frankly we're worried.

Women in Engineering

Dear Women  
Recent study has shown that there are actually no women engineers. You are actually a man's brain trapped inside a woman's body. So therefore you couldn't have written this letter since you do not actually exist. So keep your letters out of this literary masterpiece of a newspaper.

NOVEMBER 12 1987

# TOIKEOSCOPES

**ARIES**

Mars is shiny red glint is sending positive rays your way. Be sure to balance this with strong pessimism in your life.

**TAURUS**

Alpha Centuri planets are aligning month. Your Academic needs and your toilet needs will not however.

**GEMINI**

If you're 45th President of the Greatest Country the World has ever seen, don't press the red button. Plz. Only the best presidents don't press the button.

**CANCER**

A Cosmic storm is passing by Uranus. Great fortune and great friendship will be granted upon you this month!

**LEO**

Avoid peach dessert dishes. Typhoid is making a comeback, but, only for Leos.

**VIRGO**

Phobos lit with a red hue, and so is your WeBWork result.

**LIBRA**

The next time somebody says "integral" you may be be facing possible death. Protect yourself by chanting "partial fractions" three times before bed.

**SCORPIO**

Barnard's Star is following a course slightly lower than predicted. Your course results will also follow this path.

**SAGITTARIUS**

Jupiter's rings are spinning out of control! You're going to have a crazy time getting home next Saturday

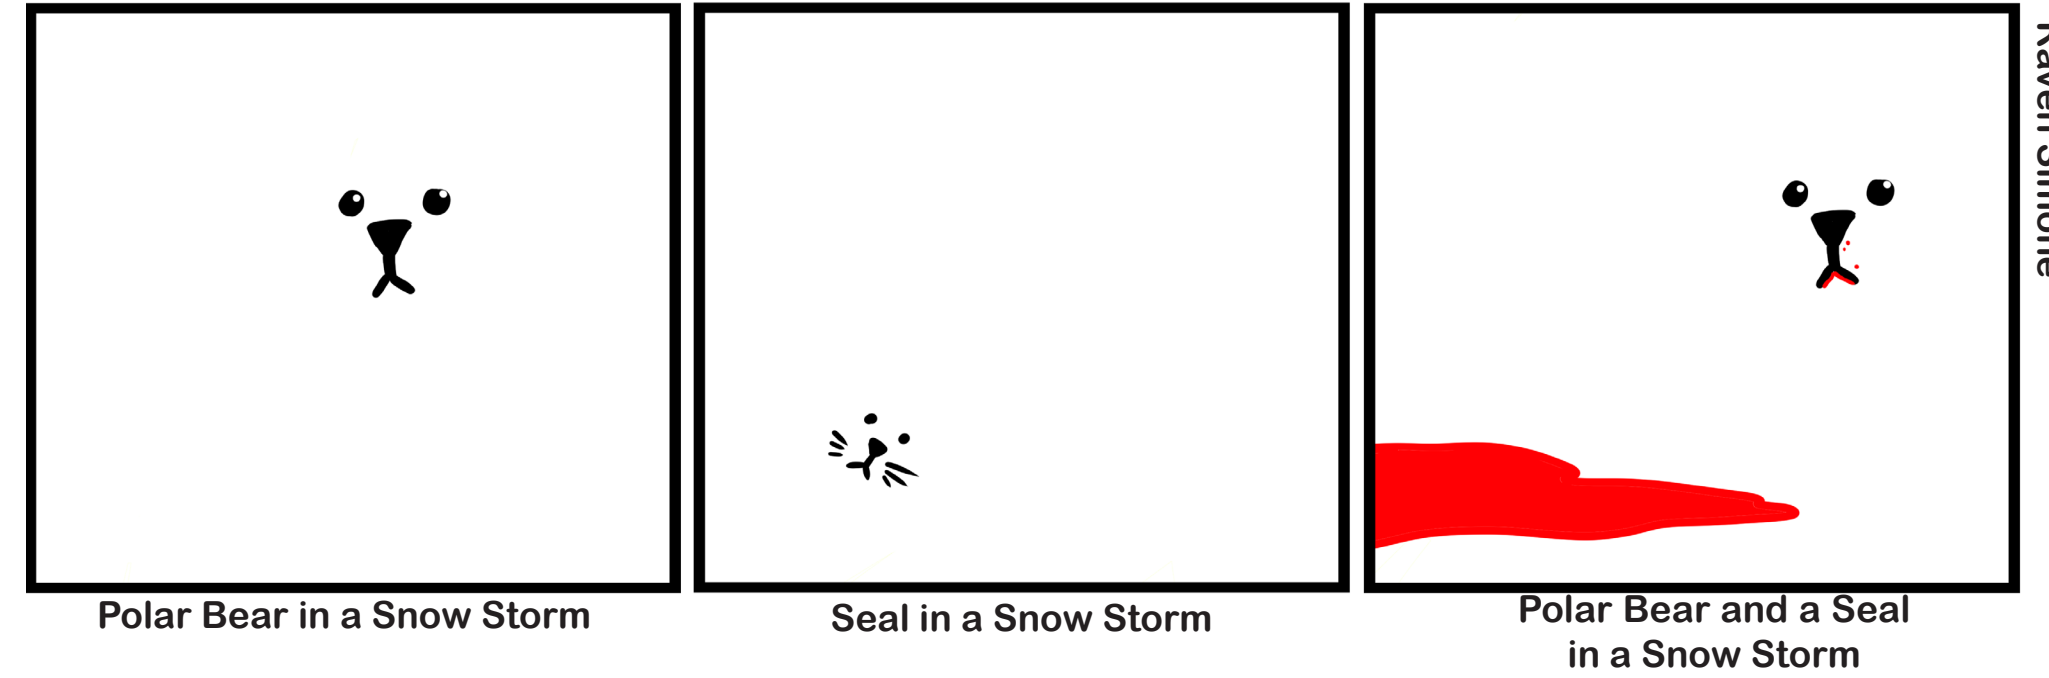

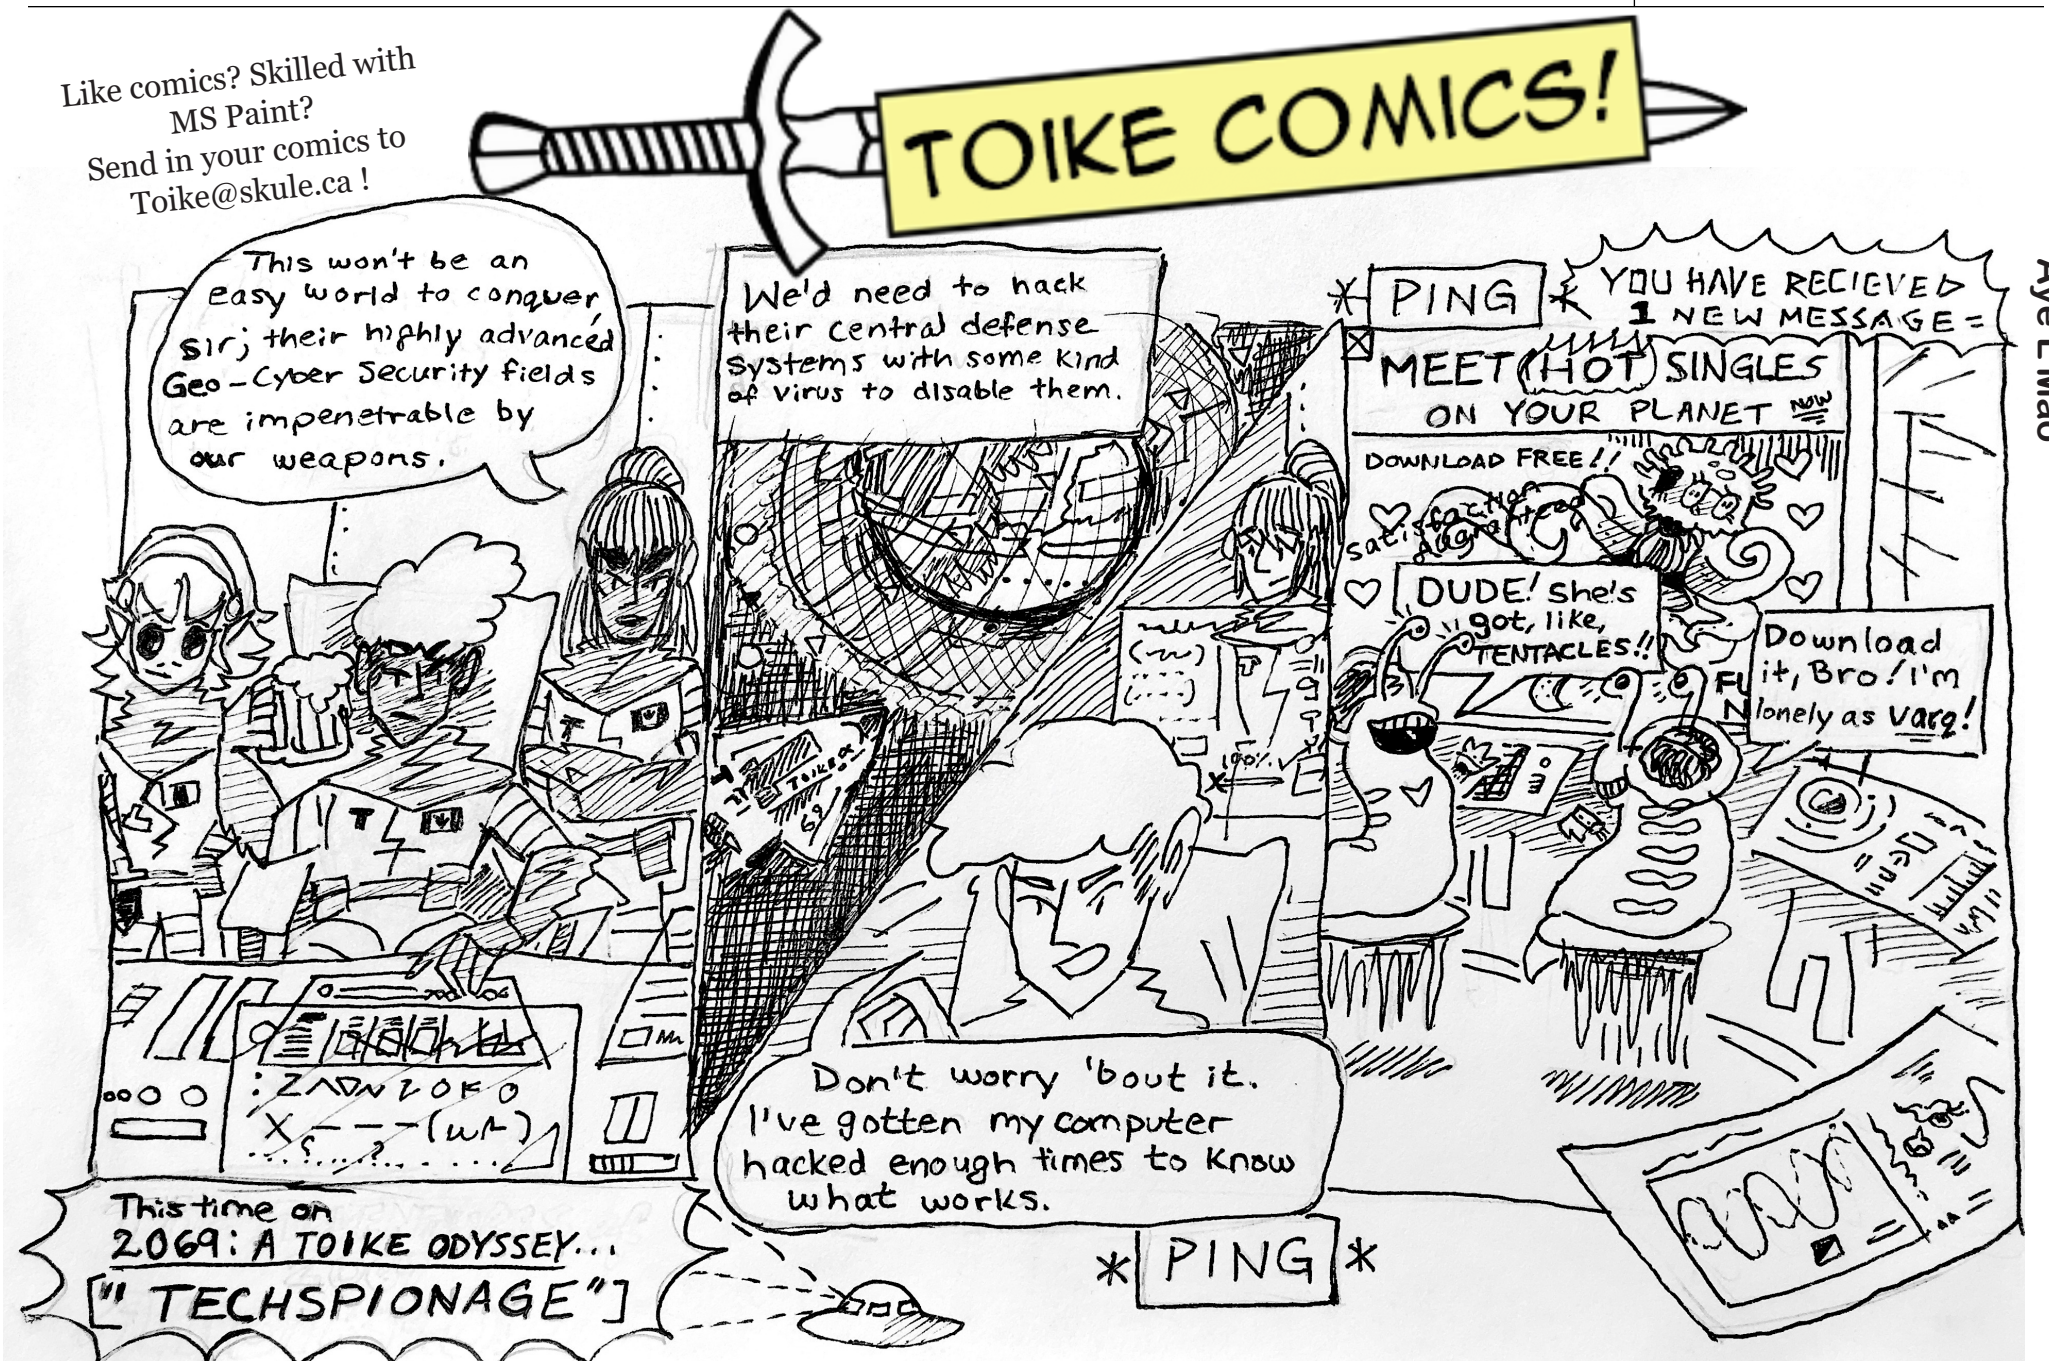

**CAPRICORN**

Pluto's orbital velocity is rough this month. Pay mind to your hairline and the prescence of nits.

**AQUARIUS**

With the Winter season coming to a close, and the ice melting, your energy to enjoy life will pick up. Harness this energy by trying new things. Like going outside.

**PISCES**

## Want to join the Toike?

## Read this Black Box!

Are you fairly hilarious? We want you!  
Can you photoshop like a boss? Join our graphics team!  
Do you want to try your hand at humour writing? Become one of our staff writers!  
Do you have the mad English skills required to pick out our typos and grammar follies? Do content editing for us!

**Head over to [www.toike.skule.ca/join](http://www.toike.skule.ca/join) and get on the mailing list!**

You'll automatically be notified of upcoming meeting dates, times, and locations.

Alternatively, if you're interested in something specific, like graphics, editing, layout, multimedia, social media or distribution, email [toike@skule.ca](mailto:toike@skule.ca) and let us know!

Get involved with your friendly neighbourhood Toike Oike! Anyone can join.
