Dear Toikeers,

This, in the Toike editorial, the editors aim to engage the readers, to always be on their toes. I hope you find this message interesting and thought-provoking. Let me know how you feel about it.

With kind regards,
Jennifer Dixon
Editor-in-Chief

Four Score and the last JCN ago, a new issue of the Toike Azawa reaches the distress of many, because the Toike Editorial Editor-in-Chief.

Toike issues featured this Month:
1971 Volume 64, February
1972 Volume 66, October
1973 Volume 70, November
1974 Volume 71, June
1975 Volume 72, April
1976 Volume 77, December
1977 Volume 89, March
1978 Volume 90, November
1979 Volume 91, January
1980 Volume 92, September

I initially wanted include the Toike’s revival in the Toike Oike is over 100 years old. You can see how much we have changed. That’s right, we can see how much we have changed.

FOUR SCORE AND THE LAST JCN AGO

In this Toike editorial, the editors are not just saying, to always be on their toes. I hope you find this message interesting and thought-provoking. Let me know how you feel about it.

With kind regards,
Jennifer Dixon
Editor-in-Chief

The Toike Oike, Vol CVII — APRIL 2018

Letters to the Editor

Dear Ms. Editor,

I was very glad to get your letter. It carried the news that the good old Toike Oike Azawa had returned to life. It seems as if you remember quite well the thrill of the “Toike” — Toike Oike Azawa, the only news paper that ever existed, is now back in action. I think that the School would have a great deal of profit, that could be written in a very short time. I am not sure that the other Toike Azawa’s will continue, as a consequence of such writing.

Thank you for your letter. I look forward to hearing from you again.

With kind regards,
Jennifer Dixon
Editor-in-Chief

The Toike Oike is a radical, non-compliant, and irreverent news paper that exists to challenge the status quo and to provide a platform for alternative voices. It is the only news paper that exists in the city and is known for its bold and fearless reporting.

COLOPHON

every month, in or out of print. The name of the Toike Oike Azawa editor is not known. It is named after the use of the term “Toike” is named after it.

Sincerely,

Jennifer Dixon

Dear Ms. Editor,

What’s the most useful thing you’ve learned about PDEs? Do you have any advice for students studying Partial Differential Equations?

Sincerely,

Jennifer Dixon

Dear Ms. Editor,

I am writing to you to give you feedback on an article that was published recently in the Toike Oike. The article was titled “The Earth is Flat” and was written by a student named Steve. I would like to express my concerns about the article.

After a long, hard, sweaty, and sleepless night of writing, the author is ultimately unsatisfied, but fakes it anyway. “Oh, yeah, baby! That’s the one I want right there!”

As the deadline for content arrives, the Toike Oike editor decides to resort to the largest, most powerful, and most persuasive argument. “You, yes, I know that we just...”

Most of the time, this is the only way to get someone to write for us. Sometimes, it can be a bit of a hassle, but it’s the only way to get someone to do something you want.

Sincerely,

Jennifer Dixon

Dear Ms. Editor,

I am writing to you to express my concerns about the article titled “The Earth is Flat” that was recently published in the Toike Oike. The article was written by a student named Steve and it presented an alternative view to the accepted scientific consensus that the Earth is round.

After a long, hard, sweaty, and sleepless night of writing, the author is ultimately unsatisfied, but fakes it anyway. “Oh, yeah, baby! That’s the one I want right there!”

As the deadline for content arrives, the Toike Oike editor decides to resort to the largest, most powerful, and most persuasive argument. “You, yes, I know that we just...”

NEW SKULE DESIGN

82 years ago, construction was begun on a modest three-storey brick building on the south-eastern edge of the front campus. Christened the "School of Practical Science," it has become better known to thousands of engineering students as the beloved "little red Skulehouse." In its lecture rooms and laboratories, some of the finest minds in the fields of engineering, physics, and chemistry have developed their knowledge and skills.

Meanwhile, a big moving job is in progress on the western side of the campus. The Forestry Building was being moved at the speed of several inches per day from its original site, a few hundred yards north of the Wallace Building, to its present location.

The new Engineering Building will occupy the void between the Wallace and the Forestry Buildings and will be connected to the western end of the Physics Building.

This new structure will contain modern lecture rooms, offices, laboratories, and seminar rooms in sufficient numbers and of sufficient size to comfortably accommodate students for the next decade. In addition, with the completion of the new Physics Building, the old one will be made part of the Engineering Building.

The project is expensive. In fact, the construction of the Engineering Building alone will cost seven million dollars.

Even with the rise of a new home, the Engineers will not immediately lose their red Skulehouse. During the past semester, a summer, repairs were made on the weathered brick walls and some badly-needed redecorating and painting were done on the interior.

The facilities of this building will be used for the overflow of students from the new structure. Thus, Tradition will march hand in hand with progress.

Within the next few years, the new Engineering Building will develop its own traditions. Will one of these be that students will refer to it as "the new Skulehouse?" And in the more distant future, when the Engineering Building is destroyed, will the new one replace the warmth and ancient dignity that caused us to look upon our little red Skulehouse as our Engineering home?

BOOM!!

It makes Artsmen turn in fright, it makes Mathmen flee. It makes Skulemen cheer wildly. It unites engineers in a common front against their "enemies." It is the symbol of Skule supremacy on the campus; it's the SKULE CANNON.

All freshmen will soon be introduced to this beloved instrument. Its penetrating roar will be heard many times in the next few weeks. At first glance, the firing of all faculties might be disappointed by its size. A big mistake! This is a powerful field piece and must be handled with respect.

The Cannon makes an appearance at all major social and athletic events on campus. Immediately all engineers present gathered around it and proudly shout "Toike Oike" after its deafening volley. Freshmen, pay particular heed to these instructions.

You will soon realize that everywhere the cannon is fired, it is always chained to several husky, muscular Skulemen. This precaution prevents its theft by conniving Artsmen and prevents damage to the cannon during its powerful recoil action.

The past summer, cannoner Bill Regas has turned a new barrel and the cannon can now accommodate a larger and deadlier charge. All of Skule's rivals beware. The cannon is ready to defend Skule's reputation.

**Courting or Engineers**

**1. Lecture Capture and Chill**

This is the sort of segment every respectable couple has had - what sort of TV show or movie should they watch in the comfort of their homes and couches, away from the prying eyes of the ‘singles’. They should avoid any confrontational topics, and for someone beginning to enter into this curious world of courtship, that could have disastrous consequences. Therefore, a brilliant strategy to reach common ground with your partner could have been to foray into this curious world of courtship, that could have been to foray into this curious world of courtship.

**2. Take Them on a Picnic**

The oldest and most effective trick in the book - a romantic picnic is the easiest way to get into a location that is appropriate for a pigeon’s heart. Yet it is imperative that said pigeon never enter his or her heart - the picnic might be wondering - yes, how is such a proposition possible given my current financial status as a glorified high school student? Allow us to elaborate.

Within SF is a place that, with its electrifying atmosphere and romantic fluorescent lighting, is sure to help you keep your way into your date’s heart. We are, of course, talking about the ECS labs. Improve your date with mind-blowing recipes and comprehensive comments and we guarantee you, anyone would want your user input by the end of this date. However, we must caution you against bugs and segmentation faults - always check storage space before entering values.

**3. Get Creative**

Confused about roleplay? Afraid to try something risqué in the bathroom with your new beloved? We at the Toike would like to humbly present some ideas that are guaranteed to go KABOOM all over you.

- The Blue & Gold Committee room can provide you with an excellent spot to get yourself all tied up and ‘eduroam’.
- The Varsity room is the easiest way into a ballroom to mumble in conversation and basement dungeon aesthetic
- The new building, which is going to be eight stories tall. Some students also plan to remodel the interior of the building in an effort to make it fit with the more traditional times. Early observations show that the new Little Red Skulehouse will have plenty of space for wall murals reflecting Kanada spirit and all of two women’s bathrooms.
- Subscription to the University of Texas at El Paso - discussing resolutions, kinda

**4. Switch into Arts**

Woe your beloved with classically romantic concepts such as free time, manageable amounts of debt, a GPA that you don’t have to reconcile in conversation out of embarrassment, and enjoy the benefits of such a switch are: (1) Unemployment will guarantee you a lot of time to spend together on romantic dates; (2) Impress your lover by quoting Theories on the Universe.

This monthly column features a frivolous discussion among three confederate brothers Norman and Gordon McIluhan from Moose Jaw. The monthly column is sponsored by the NIDP. The NIDP - like modulus but, like, not.

**Norm: Hi, I’m Norm McIluhan, and this is my brother, Gord.**

**Gord:** Hi there.

**Norm: **and today we’re gonna discuss. eh. resolutions.

**Gord:** Kind of a heavy subject, eh. This conversation is being published in a prestigious paper.

**Norm: **So, that’s just “resolutions.”

**Gord:** That’s what I said, resolutions is the number of pixels on your television.

**Norm: **God. eh.

**Gord:** For– oh.

**Norm: **Just stop, will ya? You should take this more seriously.

**This conversation is being published in a prestigious paper.**

A woman calls butler into her bedroom, "Charles," she says

"Yes, ma'am?" Answers the butler

"Charles, take off my dress."

"Yes, ma'am," he says as he off of the dress.

"Charles, take off my bra."

"Yes, ma'am." He says as he removes the bra.

"Now, Charles, take off my shoes and stockings."

"Yes, ma'am." He says as he removes his shoes and stockings.

"Now," says the woman. "Take off my panties. And I'm warning you, Charles, you're going to lose your job if ever catch you wearing my clothes again!"
